JOURNAL OF PHYSICS A
PROCEEDINGS OF THE PHYSICAL SOCIETY
1968—SER. 2, VOL. 1

SUBJECT INDEX

PAGE

Adiabatic invariants, generalized, method for obtaining in classical mechanics . . . 326
Air showers, extensive, experimental analysis of 82
Air showers, extensive, theoretical analysis of 72
Alpha-particle–alpha-particle scattering, S-wave, effects of vacuum polarization on . . 236
Alpha particle, effect of velocity-dependent nuclear forces on (γ, p) disintegration of . . 558
Antiproton–proton scattering, partial-wave analysis and optical model for 295

Band theory of helicon propagation in periodic structure 363
Baryons in quark model, magnetic moments of 475
Bel–Robinson tensor, generalized, as generator 277
Beta transition $\frac{1}{2}^+ \rightarrow \frac{3}{2}^-$, forbidden, in ^{99}Mo 564
Binding energy of system of three nucleons 468
Bremsstrahlung absorption coefficient, inverse, in hot plasmas, intensity dependence of . 588
Brownian motion, functional integrals in 431
Brownian motion of electrons, new theory of 629

Čerenkov energy loss of muons in water 578
Čerenkov radiation and electrodynamics of moving media 340
Classical functions corresponding to given quantum operators 385
Classical mechanics, method for obtaining generalized adiabatic invariants in . . . 326
Collisions, effect on wave motions in plasma with anisotropic pressure 367
Compton scattering, experimental investigation of polarization effects in 251
Conductivity, thermal, *see* Thermal conductivity
Conservation and hypervirial theorems, on duality of 11
Cosmic radiation, search for relativistic quarks in 569
Cosmic-ray muons, *see* Muons, cosmic-ray
Cosmic-ray neutrons at sea level in range 20–4000 GeV, energy spectrum of (L) . . . 169
Cosmic rays, high energy, in galactic disk, trajectories of 694
Cross section, total, for two-particle photodisintegration of alpha particle, calculation of . 558
Cross sections, *see also* Scattering, incoherent
Cross sections, photoelectric, of gamma rays in Al, Cu, Sn, W, Au and Pb in energy region 50–208 keV, determination of 256
Cross sections, total gamma-ray scattering, in C, Sn, W and Pt in energy region 84–662 keV, recalculation of (L) 493

Density-fluctuation approach to classical plasma 213
Deuteron, photodisintegration between 100 MeV and 320 MeV 553
Dielectric constants and optical dispersion relations in many-body optics 409
Diffraction by circular aperture in non-planar screen 148
Diffraction by circular aperture, influence of screen geometry on 376
Diffusion in system $N_2O_4 \rightleftharpoons 2NO_2$, effect of chemical reaction on 269
Dipole, accelerated, Heaviside-Feynman expression for fields of 112
Dipole, finite electric, classical motion of electron in field of 118
Dipole, point electric, classical motion of electron in field of 124
Dual-mass particle, gravitational, formula for 455
Dust distribution, non-static spherically symmetric charged, in general relativity . . 645
Dust, stationary distribution of, and electromagnetic fields in general relativity . . . 188

Einstein–Maxwell equations in general relativity, solution for matter in cylindrically symmetric magnetic field 108
Electric dipole, finite, classical motion of electron in field of 118
Electric dipole, point, classical motion of electron in field of 124
Electrodynamics of moving media and Čerenkov radiation 340
Electromagnetic fields and stationary distribution of dust in general relativity . . . 188

PAGE

Electromagnetic fields, non-static, in general relativity 650
Electromagnetic moments for arbitrary spin, evaluation of 334
Electromagnetic theory, use for calculation of fields of accelerated dipole 112
Electromagnetic waves, amplitude modulation by alternating magnetic fields 89
Electromagnetic waves, multiple scattering by turbulent plasma, transport equation for . 675
Electron, classical motion in finite electric-dipole field 118
Electron, classical motion in point electric-dipole field 124
Electron numbers, fluctuation of, in extensive air showers, experimental analysis of . 82
Electron numbers, fluctuation of, in extensive air showers, theoretical analysis of . 72
Electron–positron *g*-factor comparison experiment, crossed-fields arrangement for use in . 194
Electrons, new theory of Brownian motion of 629
Electrons, relativistic, passing through plasma, evaluation of general expression for . 358
Energy spectra of muons underground, study of 61
Energy spectrum, electronic, of liquid-like one-dimensional systems, nature of gaps in . 314
Energy spectrum of cosmic ray neutrons at sea level in range 20–4000 Gev (L) . . . 169
Expectation values, quantum-mechanical, formula for improved lower bounds to . 535
Expectation values, quantum-mechanical, formula for lower bounds to 305

Fermion systems, *N*-particle, derivation of lower-bound shell model for 596
Field, cylindrically symmetric magnetic, in presence of freely moving particles . . . 108
Fields, alternating magnetic, amplitude modulation of electromagnetic waves by . . 89
Fields, electromagnetic, and stationary distribution of dust in general relativity . . 188
Fields of accelerated dipole Heaviside–Feynman expression for 112
Fluid, one-dimensional classical, Yang–Lee distribution of zeros for 661

g-factor comparison experiment, electron–positron, crossed-fields arrangement for use in . 194
$[\Gamma]^9$ and $(\Gamma)^8$ representations for crystallographic point groups 40
Gamma-ray scattering cross sections, total, in C, Sn, W and Pt in energy region 84–662 kev, recalculation of (L) 493
Gamma rays, determination of photoelectron cross sections in Al, Cu, Sn, W, Au and Pb in energy region 50–208 kev 256
Gamma rays, incoherent scattering cross sections in lead in energy region 279–1330 kev (L) 171
Gases, resistance to relative motion of, expressions found on basis of simple kinetic theory model 139
Gaussian light, intensity-fluctuation distribution of 128, 625
Gel'fand–Levitan equations, some consequences of 610
Geodesics, relativistic space–times having corresponding 457
Gibbs–Bogoliubov inequality 539
Gravitation, *see also* Riemann tensor
Gravitation, improved theory of 501
Gravitational collapse and frequency shift in background of expanding universe . . 393
Gravitational dual-mass particle, formula for 455
Gravitational radiation, mixture of outgoing and incoming, change of mass of source of radiation 280
Gravitational waves from rotating rod, transport of energy and linear momentum by . . 97
Group SU(3), representations of 203

Heaviside–Feynman expression for fields of accelerated dipole 112
Helicon propagation in periodic structure, band theory of 363
Helicon waves in non-resistive cylindrical and spherical plasmas 710
Hypervirial and conservation theorems, on duality of 11

Ionization energy loss of muons in plastic scintillator 584

K^- mesons, stopped, absorption by light nuclei 350

Landau theory of second-order phase transitions: $[\Gamma]^9$ and $(\Gamma)^8$ for crystallographic point groups 40
Laser light, measurement of optical linewidth by photon-counting statistics (L) . . . 406
Lattice, orthohydrogen, $Pca2_1$ ordering in self-consistent model for 34
Lead, incoherent scattering cross sections of gamma rays in energy region 279–1330 kev (L). 171

PAGE

Light, Gaussian, intensity-fluctuation distribution of 128, 625
Liquid-like one-dimensional systems, nature of gaps in electronic energy spectrum of . 314
Lorentz transformation, derivation without use of light 331
Lorentzian function and differentiated Lorentzian function, graphical analysis of . . 704

Magnetic fields, alternating, amplitude modulation of electromagnetic waves by . . 89
Magnetic moments of baryons in quark model 475
Magnetic field, cylindrically symmetric, in presence of freely moving particles . . 108
Many-body optics, dielectric constants and optical dispersion relations in . . . 409
Mesons, stopped K^-, absorption by light nuclei 350
Molybdenum 99, forbidden beta transition $\frac{1}{2}^+ \rightarrow \frac{9}{2}^-$ in 564
Monte Carlo studies of excluded-volume problem in freely rotating polymer chains (L) . 404
Muon numbers, fluctuations of, in extensive air showers, experimental analysis of . . 82
Muon numbers, fluctuation of, in extensive air showers, theoretical analysis of . . 72
Muons, Čerenkov energy loss in water 578
Muons, cosmic-ray, of energy up to 10^{16} GeV, range fluctuations for 55
Muons, cosmic-ray, penetrating underground, investigation using scintillator stack . . 43
Muons, cosmic-ray, underground, study of energy spectra of 61
Muons, ionization energy loss in plastic scintillator 584

Neutron time-of-flight studies of (^{3}He, n) reactions for mass determination of nuclei ^{13}N, ^{16}F, ^{22}Mg and ^{26}Si 549
Neutrons, cosmic-ray, at sea level in range 20–4000 GeV, energy spectrum of (L) . . 169
N-fermion systems, derivation of lower-bound shell model for 596
$N_2O_4 \rightleftharpoons 2NO_2$ system, effect of chemical reaction on diffusion in 269
Nuclear forces, velocity-dependent, effect on (γ, p) disintegration of alpha particle . . 558
Nuclear rotation, Villars formalism for 1
Nuclei, light, absorption of stopped K^- mesons by 350
Nuclei ^{13}N, ^{16}F, ^{22}Mg and ^{26}Si, use of (^{3}He, n) reaction for mass determination of. 549
Nucleons, system of three, binding energy of 468

Optical correlation functions, higher-order, measurements of factorization properties of (L) . 497
Optics, many-body, dielectric constants and optical dispersion relations in 409
Orthohydrogen, solid, $Pca2_1$ ordering in self-consistent model for 34

Particle, gravitational dual-mass, formula for 455
Particles, freely moving, cylindrically symmetric magnetic field in presence of . . . 108
$Pca2_1$ ordering in self-consistent model for solid orthohydrogen 34
Phase transitions in crystals, second-order, Landau theory of 40
Photodisintegration of deuteron between 100 MeV and 320 MeV 553
Photodisintegration, two-particle, of alpha particle, effect of velocity-dependent nuclear forces on 558
Photoelectric cross sections of gamma rays in Al, Cu, Sn, W, Au and Pb in energy region 50–208 keV, determination of 256
Photon-counting distributions, theory of periodic sampling of 690
Photon-counting experiments, use for measurements of factorization properties of higher-order optical correlation functions (L) 497
Photon-counting statistics, measurement of optical linewidth of laser light by (L) . . 406
Photons, escape from infinite cylinders (L) 495
Photons, polarized, Rayleigh scattering of 228
Plasma, *see also* Helicon propagation
Plasma, classical, density-fluctuation approach to 213
Plasma, passage of relativistic electron through, evaluation of general expression for . 358
Plasma, turbulent, transport equation for multiple scattering of electromagnetic waves by . 675
Plasma with anisotropic pressure, effect of collisions on wave motions in 367
Plasmas, hot, intensity dependence of inverse bremsstrahlung absorption coefficient in . 588
Plasmas, non-resistive cylindrical and spherical, helicon waves in 710
Point groups, crystallographic, $[\Gamma]^3$ and $\{\Gamma\}^2$ representations for 40
Polar organic vapours, investigation of thermal conductivity of 272
Polarization effects in Compton scattering, experimental investigation of 251
Polarization transfer in d(p, n)2p reaction 259

PAGE
Polarization, vacuum, effects on S-wave p–p and α–α scattering 236
Polarized photons, Rayleigh scattering of 228
Polymer chains, freely rotating, Monte Carlo studies of excluded-volume problem in (L) . 404
Positron–electron *g*-factor comparison experiment, crossed-fields arrangement for use in . 194
Potential, separable non-local, scattering from . . . . . 224, corr. 500
Proton–antiproton scattering, partial-wave analysis and optical model for 295
Proton–proton scattering, S-wave, effects of vacuum polarization on 236

Quantum-mechanical expectation values, formula for improved lower bounds to . . . 535
Quantum-mechanical expectation values, formula for lower bounds to 305
Quantum-mechanical problem of intensity-fluctuation distribution of Gaussian light . 128, 625
Quantum-mechanical sum rules, upper and lower bounds to 655
Quantum operators, given, classical functions corresponding to 385
Quark model, magnetic moments of baryons in 475
Quarks, relativistic, in cosmic radiation, search for 569

Radiation, gravitational, mixture of outgoing and incoming, change of mass of source of radiation 280
Rayleigh scattering of polarized photons 228
Reaction, chemical, effect on diffusion in system $N_2O_4 \rightleftharpoons 2NO_2$ 269
Reaction, d(p, n)2p, polarization transfer in 259
Reaction, (^{3}He, n), use for mass determination of nuclei ^{12}N, ^{16}F, ^{22}Mg and ^{26}Si . . 549
Relativistic electrons passing through plasma, evaluation of general expression for . . 358
Relativistic quarks in cosmic radiation, search for 569
Relativistic space–times having corresponding geodesics 457
Relativity, general, *see also* Bel–Robinson tensor, Einstein–Maxwell equations in general relativity, Gravitational radiation, Gravitational waves
Relativity, general, cylindrically symmetric distributions of matter and magnetic energy in equilibrium in 520
Relativity, general, non-static electromagnetic fields in 650
Relativity, general, non-static spherically symmetric charged dust distribution in . . . 645
Relativity, general, stationary distribution of dust and electromagnetic fields in . . . 188
Resistance, Stokes, for nearly spherical body, development of perturbation solution for . 173
Resistance to relative motion of gases, expressions found on basis of simple kinetic theory model 139
Riemann tensor, vacuum, algebraic structure of 527
Rotating rod, transport of energy and linear momentum by gravitational waves from . . 97

Scattering, Compton, experimental investigation of polarization effects in 251
Scattering cross sections, total gamma-ray, in C, Sn, W and Pt in energy region 84–662 kev, recalculation of (L) 493
Scattering from separable non-local potential . . . . . 224, corr. 500
Scattering, incoherent, cross sections of gamma rays in lead in energy region 279–1330 kev (L) 171
Scattering, $\bar{p}$–p, partial-wave analysis and optical model for 295
Scattering problem, inverse, Gel'fand–Levitan equations for solution of 610
Scattering, Rayleigh, of polarized photons 228
Scattering, S-wave p–p and α–α, effects of vacuum polarization on 236
Scintillator, plastic, ionization energy loss of muons in 584
Screen geometry, influence on diffraction by circular aperture 376
Shell model, lower-bound, for *N*-fermion systems, derivation of 596
Space–times, relativistic, having corresponding geodesics 457
Spectra, energy, of muons underground, study of 61
Spectrum, electronic energy, of liquid-like one-dimensional systems, nature of gaps in . 314
Spectrum, energy, of cosmic-ray neutrons at sea level in range 20–4000 Gev (L) . . 169
Spin, arbitrary, evaluation of electromagnetic moments for 334
Statistical mechanics, *see also* Gibbs–Bogoliubov inequality
Statistical mechanics, classical, inequalities and variational methods in 29
Statistical mechanics with topological constraints 15
Stochastic equations, generalized 447
Stokes resistance for nearly spherical body, development of perturbation solution for . 173
Sum rules, quantum-mechanical, upper and lower bounds to 655

PAGE

SU(3) group, representations of 203

Thermal conductivity of polar organic vapours, investigation of 272
Topological constraints, statistical mechanics with 15

Universe, expanding gravitational collapse and frequency shift in background of . . 393

Vacuum polarization, effects on S-wave p–p and α–α scattering 236
Variational methods and inequalities in classical statistical mechanics 29
Villars formalism for nuclear rotation 1

Wave motions in plasma with anisotropic pressure, effect of collisions on 367

Yang–Lee distribution of zeros for classical one-dimensional fluid 661

JOURNAL OF PHYSICS A

Proceedings of the Physical Society

(General)

SERIES 2, VOLUME 1, 1968

Published by
THE INSTITUTE OF PHYSICS AND THE PHYSICAL SOCIETY
1 Lowther Gardens, Prince Consort Road, London S.W.7

OFFICERS AND MEMBERS OF THE COUNCIL, 1968–69

PRESIDENT

M. R. GAVIN, C.B.E., D.Sc., F.I.E.E., F.Inst.P.

IMMEDIATE PAST PRESIDENT

SIR JAMES TAYLOR, M.B.E., D.Sc., F.R.I.C., M.I.Min.E., F.Inst.P.

VICE-PRESIDENTS

B. R. COLES, B.Sc., D.Phil.
J. V. DUNWORTH, C.B.E., M.A., Ph.D., F.I.E.E., F.Inst.P.
SIR DAVID FOLLETT, M.A., Ph.D., F.Inst.P.
A. D. I. NICOL, B.Sc., Ph.D., F.Inst.P.

HONORARY TREASURER

P. T. MENZIES, M.A., F.Inst.P.

HONORARY SECRETARY

R. PRESS, C.B.E., M.Sc., Ph.D., F.Inst.P.

ORDINARY MEMBERS OF THE COUNCIL

P. F. CHESTER, B.Sc., Ph.D.
S. F. EDWARDS, M.A., Ph.D., F.I.M.A., F.Inst.P., F.R.S.
P. B. HIRSCH, M.A., Ph.D., F.Inst.P., F.R.S.
C. A. HOGARTH, B.Sc., Ph.D., F.Inst.P.
A. J. KENNEDY, D.Sc., M.I.E.E., F.I.M., F.Inst.P.
J. W. MENTER, M.A., Ph.D., Sc.D., F.Inst.P., F.R.S.
J. E. ROBERTS, D.Sc., F.Inst.P.
L. A. A. THOMAS, B.Sc., F.Inst.P.

REPRESENTING BRANCHES

K. W. HILLIER, B.Sc., Ph.D., F.Inst.P.
D. H. PARKINSON, M.A., Ph.D., F.Inst.P.

PERMANENT OFFICERS

Secretary: L. COHEN, B.Sc., Ph.D., F.Inst.P.
Assistant Secretaries: P. L. FLOWERDAY, B.Sc., A.INST.P.
C. I. PEDERSEN, F.I.L., M.I.P.R. (Managing Editor)
Assistant Editors: MISS H. CARCAS, MISS M. A. CHARNEY, B.Sc.,
S. DONOHOE, B.A., K. F. G. PAULUS, M.Sc., Ph.D.
Finance Officer: R. H. MASON
Meetings Officer: L. LAWRENCE
Registrar: R. G. ROBERTS, B.A.
Administrative Officers: MISS D. G. MAYSTON, N. WALTER, B.A.

CONTENTS

No. 1 *January* 1968

PAPERS PAGE

The Villars formalism for nuclear rotation . R. E. PEIERLS and J. N. URBANO 1
On the duality of hypervirial and conservation theorems . W. G. SULLIVAN 11
Statistical mechanics with topological constraints: II . . S. F. EDWARDS 15
Inequalities and variational methods in classical statistical mechanics . . . . . T. LUKES and R. JONES 29
$Pca2_1$ ordering in a self-consistent model for solid orthohydrogen . . . . . W. M. FAIRBAIRN and M. R. STEEL 34
The Landau theory of second-order phase transitions: $[\Gamma]^3$ and $\{\Gamma\}^2$ for crystallographic point groups . . . . A. P. CRACKNELL and S. J. JOSHUA 40
An investigation of cosmic rays underground using a scintillator stack: V—A study of groups of muons penetrating underground . . . J. C. BARTON 43
Range fluctuations for muons of energy up to 10^6 GeV . . . . . J. L. OSBORNE, A. W. WOLFENDALE and E. C. M. YOUNG 55
A study of the energy spectra of muons underground . . . . . R. CRAIG, J. L. OSBORNE, A. W. WOLFENDALE and E. C. M. YOUNG 61
A theoretical analysis of extensive air showers: II—Fluctuations of muon and electron numbers . . . . . J. F. DE BEER, B. HOLYOAK, H. ODA, J. WDOWCZYK and A. W. WOLFENDALE 72
An analysis of experimental results on fluctuations of muon and electron numbers in extensive air showers . . . . . C. ADCOCK, J. F. DE BEER, H. ODA, J. WDOWCZYK and A. W. WOLFENDALE 82
Amplitude modulation of electromagnetic waves by alternating magnetic fields . . . . . M. S. SODHA, A. K. ARORA and P. K. KAW 89
Transport of energy and momentum by gravitational waves from a rotating rod: the linear approximation . . . . . M. A. ROTENBERG 97
A cylindrically symmetric field in the presence of freely moving particles . . . . . M. M. SOM 108
The Heaviside-Feynman expression for the fields of an accelerated dipole . . . . . J. J. MONAGHAN 112
Classical motion of an electron in an electric-dipole field: I—Finite dipole case . . . . . J. E. TURNER and K. FOX 118
Classical motion of an electron in an electric-dipole field: II—Point dipole case . . . . . K. FOX 124
The intensity-fluctuation distribution of Gaussian light . . . . . E. JAKEMAN and E. R. PIKE 128
The resistance to the relative motion of gases . . . . . I. P. WILLIAMS and D. K. SARVAJNA 139
Diffraction by a circular aperture in a non-planar screen . . H. S. TAN 148

BOOK REVIEWS 154

LETTERS TO THE EDITOR

The energy spectrum of cosmic-ray neutrons at sea level in the range 20–4000 GeV . . . . . F. ASHTON and R. B. COATS 169
Incoherent scattering cross sections of gamma rays in lead in the energy region 279–1330 keV . . . . . K. PARTHASARADHI 171

No. 2 *March* 1968

PAPERS PAGE

The Stokes resistance for a nearly spherical body . . . . . S. F. EDWARDS and G. J. PAPADOPOULOS 173
Stationary distributions of dust and electromagnetic fields in general relativity . . . . . A. BANERJEE and S. BANERJI 188
A crossed-fields arrangement for use in an electron–positron g-factor comparison experiment . . . . . I. A. GALBRAITH and R. B. GARDINER 194
On the representations of the group SU(3) . . . . S. D. MAJUMDAR 203
Density-fluctuation approach to the classical plasma . . T. GASKELL 213
Scattering from a separable, non-local potential . . . . . R. L. CASSOLA and R. D. KOSHEL 224
Rayleigh scattering of polarized photons . . . . . D. R. S. SOMAYAJULU and V. LAKSHMINARAYANA 228
Vacuum polarization and low-energy scattering . . . M. W. KERMODE 236
Polarization effects in Compton scattering . . . . . A. S. RAJU, J. RAMA RAO and V. LAKSHMINARAYANA 251
Photoelectric cross sections of gamma rays in Al, Cu, Sn, W, Au and Pb in the energy region 50–208 kev . . . . . K. PARTHASARADHI 256
Polarization transfer in the d(p, n)2p reaction . G. V. DASS and N. M. QUEEN 259
Effect of chemical reaction on diffusion in the system $N_2O_4 \rightleftharpoons 2NO_2$ . . . . . T. K. RAI DASTIDAR, A. SARAN and A. K. BARUA 269
Heat transfer in polar organic vapours . . . . . A. MANNA, A. DAS GUPTA and B. N. SRIVASTAVA 272
The generalized Bel–Robinson tensor as a generator . . J. S. DOWKER 277
Mixture of outgoing and incoming gravitational radiation: change of mass of the source of radiation . . . . . M. A. ROTENBERG 280
Partial-wave analysis and optical model for $\bar{p}$–p scattering . F. MARČELJA 295

BOOK REVIEWS 297

No. 3 *May* 1968

PAPERS

Lower bounds to expectation values . . . . . F. WEINHOLD 305
The nature of the gaps in the electronic energy spectrum of liquid-like one-dimensional systems . . . . . J. HORI 314
Generalized adiabatic invariants in classical mechanics . . . . . L. NAVARRO and L. M. GARRIDO 326
Derivation of the Lorentz transformation without use of light . H. ALMSTRÖM 331
Electromagnetic moments for arbitrary spin . . . . . K. R. JAMES 334
Electrodynamics of moving media and the Čerenkov radiation . . . . . N. D. SEN GUPTA 340
Absorption of stopped K^- mesons by light nuclei . . IL-TONG CHEON 350
Passage of relativistic electrons through a plasma . . . . J. RAE 358
A band theory of helicon propagation . A. C. BAYNHAM and A. D. BOARDMAN 363
Effect of collisions on wave motions in a plasma with anisotropic pressure . . . . . S. R. SHARMA 367
The influence of screen geometry in diffraction by a circular aperture H. S. TAN 376
Classical functions corresponding to given quantum operators . C. L. MEHTA 385
Gravitational collapse and frequency shift . . . . . M. M. SOM 393

BOOK REVIEWS 399

LETTERS TO THE EDITOR

Monte Carlo studies of the excluded-volume problem in freely rotating polymer chains . . . . . R. J. FLEMING 404
A measurement of optical linewidth by photon-counting statistics . . . . . E. JAKEMAN, C. J. OLIVER and E. R. PIKE 406

No. 4 *July* 1968

PAPERS PAGE

Many body optics: I—Dielectric constants and optical dispersion relations . . . . . R. K. BULLOUGH 409
Functional integrals in Brownian motion . . . G. J. PAPADOPOULOS 431
Generalized stochastic equations . . . . K. C. So and K. C. YEH 447
A note on the mass formula $m = nm_0$ . . . . . J. S. DOWKER 455
Relativistic space–times having corresponding geodesics . G. WILLIAMS 457
The binding energy of three nucleons . . . . . R. L. HALL 468
Magnetic moments of baryons in a quark model . . . . K. R. JAMES 475

BOOK REVIEWS 483

LETTERS TO THE EDITOR

Total gamma-ray cross sections in C, Sn, W and Pt in the energy region 84–662 kev . . . . V. VISWESWARA RAO and K. PARTHASARADHI 493
Escape of photons from infinite cylinders . . . . . A. BANERJEE 495
Measurements of the factorization properties of higher-order optical correlation functions . . . . E. JAKEMAN, C. J. OLIVER and E. R. PIKE 497

CORRIGENDUM

Scattering from a separable, non-local potential . . . . . R. L. CASSOLA and R. D. KOSHEL 500

No 5. *September* 1968

PAPERS PAGE

An improved theory of gravitation: II . . . . P. RASTALL 501
Cylindrically symmetric distributions of matter and magnetic energy in equilibrium in general relativity . . . . . S. BANERJI 520
The algebraic structure of the vacuum Riemann tensor . . . . . J. A. ROCHE and J. S. DOWKER 527
Improved lower bounds to expectation values . . . . F. WEINHOLD 535
The Gibbs–Bogoliubov inequality . . . . . A. ISIHARA 539
Mass determination of the nuclei ^{12}N, ^{16}F, ^{22}Mg and ^{26}Si using the (^3He, n) reaction . . . . J. M. ADAMS, A. ADAMS and J. M. CALVERT 549
Photodisintegration of the deuteron between 100 MeV and 320 MeV . . . . . A. M. SMITH, S. J. HALL, B. MANN and D. T. STEWART 553
Effect of velocity-dependent nuclear forces on (γ, p) disintegration of the alpha particle . . . . . S. C. JAIN and B. K. SRIVASTAVA 558
The forbidden beta transition $\frac{1}{2}^+ \rightarrow \frac{3}{2}^-$ in ^{99}Mo . . . . . K. B. APPALACHARYULU, D. L. SASTRY and S. JNANANANDA 564
A search for relativistic quarks in the cosmic radiation . . . F. ASHTON, R. B. COATS, G. N. KELLY, D. A. SIMPSON, N. I. SMITH and T. TAKAHASHI 569
Cerenkov energy loss of muons in water . . . . . D. ALEXANDER, K. M. PATHAK and M. G. THOMPSON 578
Ionization energy loss of muons in a plastic scintillator . . . . . I. S. JONES, K. M. PATHAK and M. G. THOMPSON 584
Intensity dependence of the inverse bremsstrahlung absorption coefficient in hot plasmas . . . T. P. HUGHES and M. B. NICHOLSON-FLORENCE 588
Many particle systems: VI—*N*-fermion systems: derivation of a lower-bound shell model . . . . . R. J. M. CARR and H. R. POST 596
Some consequences of the Gel'fand-Levitan equations . . . M. I. SOBEL 610

No. 5 (*cont.*) *September* 1968

PAGE

BOOK REVIEWS 617

LETTERS TO THE EDITOR

Comments on a paper by E. Jakeman and E. R. Pike 'The intensity-fluctuation distribution of Gaussian light' . . . . . L. Mandel and E. Wolf; E. Jakeman and E. R. Pike 625

No. 6 *November* 1968

PAPERS

Brownian motion of electrons . . . . . J. H. Williamson 629

Non-static spherically symmetric charged dust distribution in general relativity. . . . . U. K. De 645

Non-static electromagnetic field in general relativity: II . . . . . K. Bera and B. K. Datta 650

Upper and lower bounds to quantum-mechanical sum rules . F. Weinhold 655

The Yang–Lee distribution of zeros for a classical one-dimensional fluid . . . . . O. Penrose and J. S. N. Elvey 661

A transport equation for the multiple scattering of electromagnetic waves by a turbulent plasma . . . . . P. E. Stott 675

Theory of periodic sampling of photon-counting distributions. . . . . E. Jakeman and E. R. Pike 690

Trajectories of high-energy cosmic rays in the galactic disk . . . . . K. O. Thielheim and W. Langhoff 694

The graphical analysis of a Lorentzian function and a differentiated Lorentzian function . . . . . W. Gough 704

Helicon waves in non-resistive cylindrical and spherical plasmas . . . . . J. L. A. Francey and D. J. Gates 710
